Evolution Questions And Answers

Evolution is the supposed process by which the first cell evolved into the diversity of life we see today. Natural selection and mutations are considered its driving force.

Evolution | Answers in Genesis

One can either take the Bible as the basis for scientific truth or use ever-changing evolutionary assumptions as the foundation for your biblical and scientific knowledge. The Bible-as-base model resolves contradictions and gives concrete answers; the evolution-as-base model is as unsure as building a house on sand. Ken Ham knows this, and wants to provide families and individuals with the ...

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.
