Abstract. The proper understanding and use of statistical tools are essential to the scientific enterprise. This is true both at the level of designing one's own experiments as well as for critically evaluating studies carried out by others.

A biologist's guide to statistical thinking and analysis

The biases and weights in the Network object are all initialized randomly, using the Numpy `np.random.randn` function to generate Gaussian distributions with mean \$0\$ and standard deviation \$1\$. This random initialization gives our stochastic gradient descent algorithm a place to start from. In later chapters we'll find better ways of initializing the weights and biases, but this will do for now.
