Earthfast or post in ground construction. Buildings and structures have a long history of being built with wood in contact with the ground. Post in ground construction may technically have no foundation. Timber pilings were used on soft or wet ground even below stone or masonry walls. In marine construction and bridge building a crisscross of timbers or steel beams in concrete is called grillage.

Hi Robert, Thanks for reaching out. 1 acre ought to be plenty of land for a 30 unit podium project. I don't know where your project is located, and that would inform overall cost per square foot, but while you're correct in that phasing is an effective risk mitigation strategy, the overall cost of two buildings will be a fair bit higher than one single building.
