What is Economics? | Economics Definition

Macroeconomics (from the Greek prefix makro-meaning "large" + economics) is a branch of economics dealing with the performance, structure, behavior, and decision-making of an economy as a whole. This includes regional, national, and global economies. Macroeconomists study aggregated indicators such as GDP, unemployment rates, national income, price indices, and the interrelations among the ...

Keynesian economics advocates for the public sector to step in to assist the economy generally, which is a significant departure from popular economic thought that preceded it — laissez-faire capitalism. Laissez-faire capitalism supported the exclusion of the public sector in the market. The belief was that an unfettered market would achieve balance on its own.
