In the first biblical creation account (Genesis 1:1-2:4a), God created trees on the third day, which was at a time when there was no sun to sustain them - the sun being created on the fourth day.

Which day did God create the trees - answers.com

Spermatogenesis is the process of making sperm cells, or developing immature germ cells known as spermatogonia into mature sperm cells called spermatozoa. A sperm cell is the male reproductive cell that fertilizes the female egg in sexual reproduction. A male's ability to reproduce depends on a high quality and quantity of sperm; therefore, spermatogenesis occurs continually from the time of ...

Maize (/ m eɪ z / MAYZ; Zea mays subsp. mays, from Spanish: maíz after Taino: mahiz), also known as corn, is a cereal grain first domesticated by indigenous peoples in southern Mexico about 10,000 years ago. The leafy stalk of the plant produces pollen inflorescences and separate ovuliferous inflorescences called ears that yield kernels or seeds, which are fruits.

In some circles, however, opposition to the concept of evolution has persisted to the present. The argument from design has recently been revived by a number of academics with scientific credentials, who maintain that their version of the idea (unlike Paley's) is soundly supported by both microbiology and mathematics.

Introduction This page was written in collaboration with Borislav Dopudja, a third-year science student at the University of Zagreb. It grew out of some casual but extensive discussions we were having exploring some of the oddities of the microbial world, things that don't quite fit with our common views.

Unusual microbes - b Bruner

Introduction. Does the idea of business models matter? The term has become widely used in board rooms, by managers in organisations, by consultants, by commentators of business, and even on radio and television programmes aimed at the general public.
