In fluid dynamics, a stall is a reduction in the lift coefficient generated by a foil as angle of attack increases. This occurs when the critical angle of attack of the foil is exceeded. The critical angle of attack is typically about 15 degrees, but it may vary significantly depending on the fluid, foil, and Reynolds number.. Stalls in fixed-wing flight are often experienced as a sudden ...

Pressure (symbol: p or P) is the force applied perpendicular to the surface of an object per unit area over which that force is distributed. Gauge pressure (also spelled gage pressure) is the pressure relative to the ambient pressure.. Various units are used to express pressure. Some of these derive from a unit of force divided by a unit of area; the SI unit of pressure, the pascal (Pa), for ...

Stress. Stress is the ratio of applied force F to a cross section area-defined as "force per unit area".. tensile stress - stress that tends to stretch or lengthen the material - acts normal to the stressed area; compressive stress - stress that tends to compress or shorten the material - acts normal to the stressed area; shearing stress - stress that tends to shear the material - acts in ...

Headlines about how video games affect the brain range from upbeat to dire. Psychologist Douglas A. Gentile asserts that although violent games in particular can have negative consequences, well-designed games can teach positive skills. He proposes five attributes of video game design that can help explain findings and guide future research.

Fructose it seems can induce ketogenesis and if we accept that ketones are an indication of hypoxia and we consider the implications of chronic hypoxia and that it precipitates all disease, all the sudden we have a very plausible explanation for the association of fructose with different disease states.

1. Introduction. Shorelines change in a wide range of temporal and spatial scales from both natural and human-induced factors (Stive et al., 2002). Coastal erosion and flooding are major global problems but becoming more acute as climate change converges with coastal development and natural geomorphic changes (Hallegatte et al., 2013, Kron, 2013, Reguero et al., 2015a).
