Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Matrilineality is the tracing of kinship through the female line. It may also correlate with a social system in which each person is identified with their matriline – their mother's lineage – and which can involve the inheritance of property and/or titles. A matriline is a line of descent from a female ancestor to a descendant (of either sex) in which the individuals in all intervening ...

It is virtually impossible for man in what the Apostle Paul portrayed as his organic "natural" condition of mind (see What Difference Does It Make), to comprehend the enigma of a paradoxical reality. Yet, he finds himself immersed in a paradoxical world -- often eating the forbidden fruit of the Tree of Duality by embracing one paradoxical truth, while rejecting its opposite that is equally true.
