Motion and Forces - bays3rdgrade.weebly.com

The motion of an object is determined by the sum of the forces (pushes and pulls) acting on it. You need a force to start moving, change the direction of, or stop an object. Force creates change in motion. A force can be seen or unseen. Objects and systems that turn on a central axis exhibit rotational motion. Balance is a result of equal effort.

Balance and Motion - FOSS - orange.k12.nj.us

The FOSS Force and Motion course investigates linear motion, including position and several aspects of change of position-distance, displacement, speed, velocity and acceleration. They investigate fundamental forces (gravity and electromagnetism) in familiar environments such as pushes, pulls, impacts and falls.
