Learn that organisms have chromosomes composed of DNA. Genes are pieces of DNA and are instructions for inherited traits. Dominant and recessive genes combine to create your physical appearance.

Genetics Introduction - YouTube

Gene expression is the process by which information from a gene is used in the synthesis of a functional gene product. These products are often proteins, but in non-protein coding genes such as transfer RNA (tRNA) or small nuclear RNA (snRNA) genes, the product is a functional RNA.. The process of gene expression is used by all known life—eukaryotes (including multicellular organisms ...

Gene expression - Wikipedia

Research on heritability of IQ implies, from the similarity of IQ in closely related persons, the proportion of variance of IQ among individuals in a study population that is associated with genetic variation within that population. This provides a maximum estimate of genetic versus environmental influence for phenotypic variation in IQ in that population as environmental factors may be ...

Heritability of IQ - Wikipedia

The expression "hands-on, minds-on" summarizes the philosophy we have incorporated in these activities - namely, that students will learn best if they are actively engaged and if their activities are closely linked to understanding important biological concepts. Many of our activities are explicitly aligned with the Next Generation Science Standards, as indicated by (NGSS) in the descriptions ...

Hands-on Activities for Teaching Biology to High School or ...

The new idiom of genofond was adopted by several speakers during the conference on agriculture that took place in Leningrad in December 1927, under the auspices of the KEPS, the Commission of the Academy of Sciences on the study of productive natural forces (Adams, 1979). Following this conference where geneticists gathered with geologists (headed by the geochemist Vladimir Vernadsky, the KEPS ...

Glossary of Biological Terms ← BACK. A abdomen. In vertebrates, the portion of the trunk containing visceral organs other than heart and lungs; in arthropods, the posterior portion of the body, made up of similar segments and containing the reproductive organs and part of the digestive tract.

Pearson - The Biology Place - Prentice Hall

Overview: Students learn how artificial selection can be used to develop new dog breeds with characteristics that make the dogs capable of performing a desirable task. Students begin by examining canine features and their functions. They are then given a scenario that describes the type of task they need a new breed of dog to perform.

Artificially Selecting Dogs - UCMP

Seventh grade science Here is a list of science skills students learn in seventh grade! These skills are organized into categories, and you can move your mouse over any skill name to preview the skill.
