The species-area relationship or species-area curve describes the relationship between the area of a habitat, or of part of a habitat, and the number of species found within that area. Larger areas tend to contain larger numbers of species, and empirically, the relative numbers seem to follow systematic mathematical relationships. The species-area relationship is usually constructed for ...

Primary Booklet 6 - Plants in their Natural Environment . In looking at the natural environment and more closely at plants in their habitats, children are encouraged to look beyond a single plant, its life cycle and what it needs to grow, and to consider groups of different plants living together in an area, known as the habitat.

1. Introduction. Picky eating, also known as fussy, faddy or choosy eating, is sometimes seen as being on the spectrum of 'feeding difficulties', where picky eating is the most common form at one end, with severe eating disorders at the other (McCormick & Markowitz, 2013). Others, however, view picky eating as having characteristics that are completely distinct from feeding disorders ...
