A recursive sequence  $\{f(n)\}_n$ , also known as a recurrence sequence, is a sequence of numbers  $f(n)$  indexed by an integer  $n$  and generated by solving a recurrence equation. The terms of a recursive sequences can be denoted symbolically in a number of different notations, such as  $f_n$ ,  $f(n)$ , or  $f[n]$ , where  $f$  is a symbol representing the sequence.

STANDARD F.IF.A.3 AI/AII. Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers. For example, the Fibonacci sequence is defined recursively by  $f(0) = f(1) = 1$ ,  $f(n+1) = f(n) + f(n-1)$  for  $n \geq 1$ .

Research Comments from Ciphers By Ritter Terry Ritter. The linear complexity (LC) of a sequence is the size in bits of the shortest linear feedback shift register (LFSR) which can produce that sequence. The measure therefore speaks to the difficulty of generating -- and perhaps analyzing -- a particular sequence.

1 Overview of make. The make utility automatically determines which pieces of a large program need to be recompiled, and issues commands to recompile them. This manual describes GNU make, which was implemented by Richard Stallman and Roland McGrath. Development since Version 3.76 has been handled by Paul D. Smith. GNU make conforms to section 6.2 of IEEE Standard 1003.2-1992 (POSIX.2).

The line `bar = foo` does not copy the contents of the variable, only its "object reference". To understand what is going on here, we need to know how lists are stored in the computer's memory. In 4.1, we see that a list `foo` is a reference to an object stored at location 3133 (which is itself a series of pointers to other locations holding strings). When we assign `bar = foo`, it is just the ...

In computer programming, a sentinel value (also referred to as a flag value, trip value, rogue value, signal value, or dummy data) is a special value in the context of an algorithm which uses its presence as a condition of termination, typically in a loop or recursive algorithm.. The sentinel value is a form of in-band data that makes it possible to detect the end of the data when no out-of ...
