For problem P2. We need to be a set of functions of .In the figure on the right, we have illustrated a triangulation of a 15 sided polygonal region in the plane (below), and a piecewise linear function (above, in color) of this polygon which is linear on each triangle of the triangulation; the space would consist of functions that are linear on each triangle of the chosen triangulation.

16.810 (16.682) 6 What is the FEM? Description-FEM cuts a structure into several elements (pieces of the structure).-Then reconnects elements at “nodes” as if nodes were pins or drops of glue that hold elements together.-This process results in a set of simultaneous algebraic equations.FEM: Method for numerical solution of field problems. Die Finite-Elemente-Methode (FEM), auch „Methode der finiten Elemente“ genannt, ist ein allgemeines, bei unterschiedlichen physikalischen Aufgabenstellungen angewendetes numerisches Verfahren. Am bekanntesten ist die Anwendung der FEM bei der Festigkeits- und Verformungsuntersuchung von Festkörpern mit geometrisch komplexer Form, weil sich hier der Gebrauch der klassischen Methoden (z. En analyse numérique, la méthode des éléments finis (MEF, ou FEM pour finite element method en anglais) est utilisée pour résoudre numériquement des équations aux dérivées partielles. Celles-ci peuvent par exemple représenter analytiquement le comportement dynamique de certains systèmes physiques (mécaniques, thermodynamiques, acoustiques, etc.).

The superposition principle, also known as superposition property, states that, for all linear systems, the net response caused by two or more stimuli is the sum of the responses that would have been caused by each stimulus individually. So that if input A produces response X and input B produces response Y then input (A + B) produces response (X + Y).. A function that satisfies the ...
