An important use of technology is its capacity to create new opportunities for curriculum and instruction by bringing real-world problems into the classroom for students to explore and solve; see Box 9.1. Technology can help to create an active environment in which students not only solve problems, but also find their own problems.

It may be frustrating to hear "it depends" when one asks how a spill of diluted bitumen will behave. But just like whether you wore a coat this morning "depended" on the temperature, or if it was raining, and conversely, your tolerance to cold and rain, the same with oil spills: their behavior depends on environmental factors, and the type of oil.
