When a student creates a two-column proof in geometry, reasoning from limited information to a final conclusion, no teacher or text can teach a student to always get a right answer. Getting a right answer involves actual thought and may take time and repeated analysis. Geometry is a language intensive branch of mathematics.

Geometry portions of standerdized tests are now a breeze for me. I agree that there are too few examples in the book, but as a student develops his problem solving skills, he won't need examples! My advice for those students who are struggling with a problem is to take a short break and review the parts of the book already read.
