Chapter 9 The Endocrine System Anatomy And Physiology ...

The circulatory system is fundamental for the functioning of the endocrine system. Blood collects hormones produced by endocrine glands and these hormones reach their targets through circulation. Without the circulatory system, the "action at distance" feature of the endocrine system would not be possible.

The Endocrine System - Biology Questions

This system of chemical communication, the endocrine system, works with the nervous system to regulate and control all the actions of the human machine. In this activity, you will investigate the way in which hormones interact with their target cells and create a concept map that describes the interworkings of the endocrine system.
