The Biopsychosocial Model is an interdisciplinary model that looks at the interconnection between biology, psychology, & socio-environmental factors. The model specifically examines how these aspects play a role in topics ranging from health & disease models to human development. This model was developed by George Engel in 1977 and is the first of its kind to employ this type of multifaceted ...

In chemistry, an ideal solution or ideal mixture is a solution with thermodynamic properties analogous to those of a mixture of ideal gases. The enthalpy of mixing is zero as is the volume change on mixing by definition; the closer to zero the enthalpy of mixing is, the more "ideal" the behaviour of the solution becomes. The vapor pressure of the solution obeys Raoult's law, and the activity ...

New materials, namely high-k (high-permittivity) dielectrics to replace SiO₂, Cu to replace Al, and barrier materials for Cu, are revolutionizing modern integrated circuits. These materials must be deposited as very thin films on structured surfaces.

What is in-situ microscopy?. In-situ transmission electron microscopy combines the image formation capabilities of the transmission electron microscope (TEM) with the application of one or more external stimuli to observe real-time sample dynamics. Currently, a wide variety of systems and holders are available to apply different stimuli to evaluate dynamics during electrical biasing ...
