The question is old. jqGrid don't provide variable column width. It uses always fixed column width and the width of every column will be set during creating the grid even before filling the grid with data. Moreover jqGrid don't provide a method which allows you to change the width of the column

after the grid is created.

wanderleave asked: young love, old scars, pulling stitches 'til they all come out, and I'm back on the bed you left me in. She stares at his socks on her bedspread, noting the differences as she reaches for his hand. His socks are white and stark against the cuffs of his black jeans, just like that night, dingy and worn and mended at the heel, so unlike the dark argyles Steve's parents buy.
