In mathematics, the Bernoulli numbers  $B_n$  are a sequence of rational numbers which occur frequently in number theory. The values of the first 20 Bernoulli numbers are given in the adjacent table. For every even  $n$  other than 0,  $B_n$  is negative if  $n$  is divisible by 4 and positive otherwise. For every odd  $n$  other than 1,  $B_n = 0$ . The superscript  $\pm$  used in this article designates the two sign ...

Informally, an elliptic curve is a type of cubic curve whose solutions are confined to a region of space that is topologically equivalent to a torus. The Weierstrass elliptic function  $P(z; g_2, g_3)$  describes how to get from this torus to the algebraic form of an elliptic curve. Formally, an elliptic curve over a field  $K$  is a nonsingular cubic curve in two variables,  $f(X, Y) = 0$ , with a  $K$ -rational ...

A Diophantine equation is an equation in which only integer solutions are allowed. Hilbert's 10th problem asked if an algorithm existed for determining whether an arbitrary Diophantine equation has a solution. Such an algorithm does exist for the solution of first-order Diophantine equations. However, the impossibility of obtaining a general solution was proven by Yuri Matiyasevich in 1970 ...

Recursion (adjective: recursive) occurs when a thing is defined in terms of itself or of its type. Recursion is used in a variety of disciplines ranging from linguistics to logic. The most common application of recursion is in mathematics and computer science, where a function being defined is applied within its own definition. While this apparently defines an infinite number of instances ...

Introduction. Eukaryotic cells compartmentalize biological processes to achieve spatial and temporal control over biochemical reactions. Compartmentalization has long been studied in the context of membrane-bound organelles, where mechanisms of biogenesis and transport of molecules into and out of the organelle are well understood.
