A level workbook - nclark.net

The paper first discusses how the terms 'shared', 'social' and 'shared social' values have been used in the literature. It then establishes a theoretical framework that outlines five dimensions for distinguishing different interpretations of shared and social values: value type, provider, the process used to elicit values, the intention of value and the scale.

What are shared and social values of ecosystems ...

A Biology Game To Promote Classification And Observation- Students should learn to observe with an eye to noticing differences and salient characteristics. Also students should be able to communicate these observations in a brief manner. A Demonstration of Photo-and Geotaxes in nauplii of *Artemia salina*- Students are presented with an easily observed orientation behavior of small crustaceans ...

A community is a small or large social unit (a group of living things) that has something in common, such as norms, religion, values, or identity. Communities often share a sense of place that is situated in a given geographical area (e.g. a country, village, town, or neighborhood) or in virtual space through communication platforms. Durable relations that extend beyond immediate genealogical ...
