A frog is any member of a diverse and largely carnivorous group of short-bodied, tailless amphibians composing the order Anura (literally without tail in Ancient Greek). The oldest fossil "proto-frog" appeared in the early Triassic of Madagascar, but molecular clock dating suggests their origins may extend further back to the Permian, 265 million years ago.. Frogs are widely distributed ...

The same gradient reversal process used to create a single gradient echo can be repeated to produce two or more additional GREs after a single RF-pulse. This is known as dual (or multi-) echo GRE. Generating multiple GREs is possible as long as complete loss of the transverse magnetization by T2\* relaxation has not yet occurred.
