Exploring Geology Investigation Answers

Flood geology (also creation geology or diluvial geology) is the attempt to interpret and reconcile geological features of the Earth in accordance with a literal belief in the global flood described in Genesis 6-8. In the early 19th century, diluvial geologists hypothesized that specific surface features were evidence of a worldwide flood which had followed earlier geological eras; after ...

Flood geology - Wikipedia

Is flood geology true? Geological observations of Mesopotamia show that the area has been buried by 5-6 miles of rock. Recognition of these facts have required young earth creationists to choose between the young earth paradigm and the clear teachings of Genesis 2.

McFaddin Beach is a 32-kilometer long stretch of sandy beach in Jefferson County on the upper Texas Gulf coast, extending from High Island on the west to Sea Rim State Park on the east.

McFaddin Beach - Texas Beyond History

Around the Antarctic Peninsula, a number of ice shelves have recently dramatically collapsed[2-4], resulting in glacier acceleration, thinning and grounding line retreat[5-7]. In fact, Antarctic ice shelves appear crucial to the stability of their tributary glaciers[8], and melting ice shelves could have catastrophic consequences for many glaciers.

Why study Antarctic Glaciers?

What is ecosystem science? Ecosystem science is the study of inter-relationships among the living organisms, physical features, bio-chemical processes, natural phenomena, and human activities in ecological communities.
