Mixtures Answer Key - HelpTeaching.com

Best Answer: I don't think you have the facts quite right. A reactant is the starting "stuff" in a reaction. You haven't specified any reaction so I guess I'll just define the things instead: Elements are the things that you can see on a periodic table. They are the substances you find on the Earth (and ...

are the reactants for snO elements, compounds or mixtures ...

Elements, Compounds, and Mixtures Test- Study Guide. Do you know the difference between an element and a compound? The difference between an element and a compound is that an element is a substance made of same type of atoms, whereas a compound is made of different elements in definite proportions.

Elements, Compounds, and Mixtures Test- Study Guide

A mixture is a combination of elements or compounds that are not joined chemically. Examples of mixtures include salt water, brass, sand. 1. Tell students that there are two types of mixtures - those where the parts of the mixture can be seen, such as muddy water, and those where the parts of the mixture can't be seen, such as a salt solution.
