A bone is a rigid organ that constitutes part of the vertebrate skeleton. Bones protect the various organs of the body, produce red and white blood cells, store minerals, provide structure and support for the body, and enable mobility. Bones come in a variety of shapes and sizes and have a complex internal and external structure.

### **Bone - Wikipedia**

I do several pages at a time and then connect the dots to create the boxes. I even treat this like doing a Zentangle®, making all the lines in one direction first, then turning the notebook and doing the lines in the next direction, and so on.
