Lab Terrier Mix - What To Expect From This Diverse Cross

Leptin is a hormone that helps regulate appetite by signaling hunger satisfaction (satiety). This test measures the amount of leptin in the blood to detect a deficiency that may be contributing to obesity. Leptin is produced primarily by fat cells (adipocytes) and to a lesser degree by other tissues, including the placenta in pregnant women. It is transported in the blood receptors in the ...

The lungs are part of the respiratory (breathing) system and are located in the chest, inside the rib cage and above the diaphragm. Lungs are complex organs that consist of spongy, elastic tissue equipped with structures that infuse our blood with fresh oxygen while ridding it of carbon dioxide. Oxygen enters the lungs when we inhale a breath.

Lung Diseases - Lab Tests Online

James "Jim" Wells focuses on understanding and modulating signaling processes in human cells through protein and small molecule design. His lab seeks activators as well as inhibitors of signaling molecules, including proteases and kinases, and uses them to study the consequences of triggering specific nodes of signaling circuits.
