The telegrapher's equations (or just telegraph equations) are a pair of coupled, linear partial differential equations that describe the voltage and current on an electrical transmission line with distance and time. The equations come from Oliver Heaviside who in the 1880s developed the transmission line model. The model demonstrates that the electromagnetic waves can be reflected on the wire ...

Cartesian Co-ordinate System : A point P(x, y, z) in Cartesian co-ordinate system is represented as intersection of three planes $x = \text{constant}$, $y = \text{constant}$ and $z = \text{constant}$, as shown in the figure below. The unit vectors along the three axes are as shown in the figure. Coordinate system represented by (x,y,z) that are three orthogonal vectors in straight lines that intersect at
