In the context of software engineering, software quality refers to two related but distinct notions: . Software functional quality reflects how well it complies with or conforms to a given design, based on functional requirements or specifications. That attribute can also be described as the fitness for purpose of a piece of software or how it compares to competitors in the marketplace as a ...

In Fig. 1 we provide an overview of the types of interventions considered in this review classified by two dimensions: (1) whether the interventions are likely to induce active or passive decision-making and (2) whether they involve changes or additions to the decision environment. We include so-called 'pure' or 'non-educational' nudges (e.g. defaults, framing and peer group ...

According to Sternberg, a complete explanation of intelligence entails the interaction of these three subtheories. The componential subtheory specifies the potential set of mental processes that underlies behavior (i.e., how the behavior is generated) while the contextual subtheory relates intelligence to the external world in terms of what behaviors are intelligent and where.

A traditional model for the organization of language lessons, both in the classroom and in course-books, has long been the PPP approach (presentation, practice, production). With this model individual language items (for example, the past continuous) are presented by the teacher, then practised in the form of spoken and written exercises (often pattern drills), and then used by the learners in ...
