@Andrew One peppy clarification: I don't want to read and write to an Excel file - I need something more. I need to use it as a method/routine: to use the functions defined in the spreadsheet, feed them with input and take the output as it is calculated using Excel methods (i.e. SQRT, MINVERSE, etc) and (possibly) VBA.

Microsoft Project integrates well with other Microsoft Office products like Excel. It's easy to take an Excel spreadsheet and migrate the information it contains into a new Project file. Project is able to recognize much of the data in your spreadsheet -- if labeled correctly -- and map the data to its own fields. For help with creating a project from an Excel workbook, watch this tutorial video.
