Exploring Equilibrium Post Lab Question

In a recent review published in Nature Reviews Chemistry, Cronin group researchers describe how machine learning, coupled with real-time chemistry, is set to change the way chemists discover molecules, reactions and reactivity, as well as removing researcher bias. The systems discussed would remove the need to have a biased human chemist making judgements, in favour of searching chemical space ...

Please, James, that is the same old tired slayer argument. Yes, the ultimate *source* of energy is the sun. But if the total *downward* energy flux was only 300 W/m², then the temperature would never rise above about 35 deg. F (assuming an infrared emissivity of 0.9)...even colder if you assume convective losses.

Cybernetics is a transdisciplinary approach for exploring regulatory systems—their structures, constraints, and possibilities. Norbert Wiener defined cybernetics in 1948 as "the scientific study of control and communication in the animal and the machine." In other words, it is the scientific study of how humans, animals and machines control and communicate with each other.
