PHYSIOLOGY - professorfink

The nervous system does not work alone to regulate and maintain body homeostasis; the endocrine system is a second important regulating system. We only have one nervous system, but, because of its complexity, it is difficult to consider all of its parts at the same time; so, to simplify its study ...

Nervous System Anatomy and Physiology - Nurseslabs

The organs of the respiratory system include the nose, pharynx, larynx, trachea, bronchi, and their smaller branches, and the lungs, which contain the alveoli. The larynx or voice box routes air and food into the proper channels and plays a role in speech. The major function of the respiratory ...
