1. Introduction. This paper takes a critical look at existing fold-thrust models and interpretation strategies in fold and thrust belts. Our premise is that the tendency to use a narrow range of idealized "structural styles" for the relationships between folds and thrusts is an important source of interpretational bias that can impede understanding of structural geometry.

Adolescent cliques are cliques that develop amongst adolescents. In the social sciences, the word "clique" is used to describe a group of 2 to 12 (averaging 5 or 6) "who interact with each other more regularly and intensely than others in the same setting". Cliques are distinguished from "crowds" in that their members interact with one another (e.g. hang out together, go shopping, play basketball).
