The roots of algebra can be traced to the ancient Babylonians, who developed an advanced arithmetical system with which they were able to do calculations in an algorithmic fashion. The Babylonians developed formulas to calculate solutions for problems typically solved today by using linear equations, quadratic equations, and indeterminate linear equations.

Open questions Mathematics is something of an extreme case. In most other sciences, new theories and ideas tend to replace older ones. Hence in most sciences work that was done long ago (exactly how long depending on the particular science) is usually superceded by work done as recently as a few decades ago, or less.
