Biology Interactive Review Activities - ScienceGeek.net

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Evolution - Wikipedia

Designing experiments and procedures to test a prediction or theory. Collecting and analyzing data. Interpreting data to draw conclusions. Developing and supporting a scientific claim with evidence
