Finding the  $n$ th term of linear and quadratic sequences. I designed this as homework for a higher ability year 10 group. Each section is given a point value and students must complete at least 30 points worth of questions so they can choose to do lots of easier questions or just a few difficult questions.

I've just taught linear graphs to my Year 10s. My scheme of work tells me that I now have to teach 'real life graphs'. But what does that mean? In this post I will attempt to clarify what comes under this title. The previous GCSE specification said that students had to 'construct linear, quadratic ...

At first glance it appears that calculus features in the new GCSE specification. On closer inspection it turns out that our students will find the gradient of a curve by drawing a suitable tangent rather than by differentiating. And instead of integrating, students will use the trapezium rule (or ...
