Bicycle and motorcycle dynamics is the science of the motion of bicycles and motorcycles and their components, due to the forces acting on them. Dynamics falls under a branch of physics known as classical mechanics. Bike motions of interest include balancing, steering, braking, accelerating, suspension activation, and vibration. The study of these motions began in the late 19th century and ...

$\$ \backslash \text{begingroup} \$$ Good explanation, but pay attention that you only consider the advection and not the diffusion effect. If you solve the Navier-Stokes equations for a fully-developed viscous flow in a straight channel, you will see that the pressure remains constant in y-direction (i.e. from bottom to top side of the channel) while the velocity changes along this direction, which can be ...
