Energy economics is a broad scientific subject area which includes topics related to supply and use of energy in societies. Due to diversity of issues and methods applied and shared with a number of academic disciplines, energy economics does not present itself as a self-contained academic discipline, but it is an applied subdiscipline of economics. From the list of main topics of economics ...

The National Coast Guard team considered using voice recognition to track the caller. The prankdial provide the agents in the Coast Guard a definite sample of the caller's voice even if the call is just a simple call for help. Voice recognition may not be enough to catch the culprit but it could be a start to match the next caller to at least determine if the call is another hoax.

### **Own Energy - Life's Environment**

In physics, binding energy (also called separation energy) is the minimum energy required to disassemble a system of particles into separate parts. This energy is equal to the mass defect minus the amount of energy, or mass, that is released when a bound system (which typically has a lower potential energy than the sum of its constituent parts) is created, and is what keeps the system together.
