This exercise shows that sine can be regarded as the length of the semichord AM in a circle of radius 1, and cosine as the perpendicular distance of the chord from the centre. Until modern times, tables of sines were compiled as tables of chords or semichords, and the name 'sine' is conjectured to have come in a complicated and confused way from the Indian word for semichord.

Anger. Let's face it—anger is a fact of life. Our world is filled with violence, hatred, war, and aggression. Psychologically, many theories of human development focus on the infant's struggle with anger and frustration and the primitive fantasies of aggression, guilt, and reparation that result from these feelings.

A basic problem in imaging with x-rays (or other penetrating radiation) is that a two-dimensional image is obtained of a three-dimensional object. This means that structures can overlap in the final image, even though they are completely separate in the object. This is particularly troublesome in medical diagnosis where there are many anatomic structures that can interfere with what the ...
