Female Reproductive System Se 9

Female infertility refers to infertility in women. It affects an estimated 48 million women, with the highest prevalence of infertility affecting people in South Asia, Sub-Saharan Africa, North Africa/Middle East, and Central/Eastern Europe and Central Asia. Infertility is caused by many sources, including nutrition, diseases, and other malformations of the uterus.

Female infertility - Wikipedia

The XY sex-determination system is the sex-determination system found in humans, most other mammals, some insects (), some snakes, and some plants (). In this system, the sex of an individual is determined by a pair of sex chromosomes. Females typically have two of the same kind of sex chromosome (XX), and are called the homogametic sex. Males typically have two different kinds of sex ...

1. Introduction. The investigation and management of abnormal uterine bleeding (AUB) among nongravid women of reproductive age has been hampered both by confusing and inconsistently applied nomenclature and by the lack of standardized methods for investigation and categorization of the various potential etiologies. These deficiencies hamper the ability of investigators to study homogenous ...

Infertility means not being able to get pregnant after one year of trying (or six months if a woman is 35 or older). Women who can get pregnant but are unable to stay pregnant may also be infertile. About 10 percent of women (6.1 million) in the United States ages 15-44 have difficulty getting pregnant or staying pregnant, according to the Centers for Disease Control and Prevention (CDC).

Mitral valve prolapse is the most common abnormality of the heart valve. Most people with mitral valve prolapse do not have symptoms or signs, and do not require treatment. However, when symptoms of mitral valve prolapse or complications do occur, they include anxiety, sharp chest pain, palpitations, and migraines. Some people may need medications, and rarely, surgery to repair the heart valve.
