Just like a car's engine takes a while too cool off after a long trip, your metabolism can continue to burn more calories after a high-intensity workout than when at complete rest. This physiological effect is called excess post-exercise oxygen consumption, or EPOC. ACE Certified pro Pete McCall explains seven things you should know about EPOC and how it can help you and your clients achieve ...

The end of your presentation is one of the most important moments in training because participants usually remember what you said last and it's the way you create the closing that defines their future attitude. Nervously smiling and stating „Well, that's it" will turn out to be a mistake and a missed opportunity to reinforce [...]
