Creationists often argue that evolutionary processes cannot create new information, or that evolution has no practical benefits. This article disproves those claims by describing the explosive growth and widespread applications of genetic algorithms, a computing technique based on principles of biological evolution.

How many people do know who say that they have a "sweet tooth"? Ever hear someone say that they are "addicted" to sugar? Sugar and its role in our diet has, indeed, become a controversial topic. Many have blamed the rise in overweight and obesity in our country on sugar. Our intake of sugar has increased, but so has our intake of artificial sweeteners.
