1 Demonstrations a and b involve gravitational potential energy. Take care in defining where is the zero of gravitational potential energy. Students are often mystified when they discover that, if you raise a mass from the floor it will gain some gravitational potential energy, but that if a trap door is opened in the floor then the mass could fall further.

In philosophy, practical reason is the use of reason to decide how to act. It contrasts with theoretical reason, often called speculative reason, the use of reason to decide what to follow. For example, agents use practical reason to decide whether to build a telescope, but theoretical reason to decide which of two theories of light and optics is the best.
