Biology is the "science of life." It is the study of living and once-living things, from submicroscopic structures in single-celled organisms to entire ecosystems with billions of interacting organisms; it further ranges in time focus from a single metabolic reaction inside a cell to the life history of one individual and on to the course of many species over eons of time.

Biology - New World Encyclopedia

Introduction. If you have walked through a wooded area that's still damp from a recent rain, you may well have seen a Physarum growing on a tree stump or among the fallen leaves. Members of the genus Physarum are also called slime molds. Slime molds are classified with protists. More than 700 different species of slime molds exist.
