Shape to Fabrication 2016 is on next week, and I'm really excited about returning to London to attend and present at this event. There's an amazing line up of speakers and the opportunity to speak with the McNeel staff attending makes this an event not to be missed. Thanks to Simply Rhino for all the effort to organize this. It's 7 years ago that I last attended Shape To Fabrication, number 3 ...

The word "fractal" often has different connotations for laymen as opposed to mathematicians, where the layman is more likely to be familiar with fractal art than the mathematical concept. The mathematical concept is difficult to define formally, even for mathematicians, but key features can be understood with little mathematical background.

We always start with the array task cards, which are incredibly popular among my kids, no matter their level of understanding is. In fourth grade, we have also been working on factors and multiples, so of course, I have a set of those as well. I also have them use building equations task cards and 2 different problem solving sets.

Thanks for your response Chris this is all very helpful info. Just double checking is it only the LOB ROB and CHANNEL that affect the calculations not the stationing (i.e if you had one channel centreline at station 100 and the next cross section centreline at 200 but the LOB and ROB are equal then the calculations would not be affected)

The RAS Solution: How to draw cross sections.

I have been working on my Task Card Corner, and I'm so excited to finally share it with "the world." I'm so pleased with how it turned out, and my students are loving having all of the cards there for them to see.
