The Student's t-test is a statistical test that compares the mean and standard deviation of two samples to see if there is a significant difference between them. In an experiment, a t-test might be used to calculate whether or not differences seen between the control and each experimental group are a factor of the manipulated variable or simply the result of chance.

Ecology is the study of the intricate relationships between organisms and their environment. In order to develop a creation model of ecology, the foundation must be based on sound biblical presuppositions, beginning with the assumption that there is a Creator who desires to be known in word and deed.
