Hi Great Article, Just one question regarding one of your recommendations to do with redirected folders and offline files. You say "If a user's entire home directory is available offline and folders are redirected from the user profile to subfolders of the home directory, disable the setting in the folder redirection policy that automatically makes redirected folders available offline.

An elevator (US and Canada) or lift (Commonwealth countries) is a type of vertical transportation device that moves people or goods between floors (levels, decks) of a building, vessel, or other structure. Elevators are typically powered by electric motors that drive traction cables and counterweight systems like a hoist, although some pump hydraulic fluid to raise a cylindrical piston like a jack.
