The central concept of Newtonian mechanics is force, so we have designed an instrument to probe student beliefs on this matter and how these beliefs compare with the many dimensions of the Newtonian concept. A copy of the instrument, the Force Concept Inventory, is included here for teachers to use in any way they see fit.

Force Concept Inventory - Activities

The Force Concept Inventory is a multiple-choice test designed to monitor students' understanding of force and related kinematics. In this paper we review the development of the FCI, outline its structure and review findings from its implementation. A case is made for the FCI as a powerful tool for improving both learning and teaching of mechanics.
