The biomass is the mass of living biological organisms in a given area or ecosystem at a given time. Biomass can refer to species biomass, which is the mass of one or more species, or to community biomass, which is the mass of all species in the community. It can include microorganisms, plants or animals. The mass can be expressed as the average mass per unit area, or as the total mass in the ...

The rate of heat-transfer through the thermal mass of the floor takes longer than the heat-transfer through air. However, once the heat-transfer has fully penetrated the basement concrete slab, the consistency and elimination of hot and cold spots will far outweigh any inconveniences.

The hydrophobic interaction is mostly an entropic effect originating from the disruption of the highly dynamic hydrogen bonds between molecules of liquid water by the nonpolar solute forming a clathrate-like structure around the non-polar molecules. This structure formed is more highly ordered than free water molecules due to the water molecules arranging themselves to interact as much as ...

Other nanomedicines approved for clinical use for cancer treatment include: Myocet™, DaunoXome™, Depocyt™, Abraxane™, Genexol-PM™, and, mostly recently, Onivyde™ (see Table 1). The approval of new nanomedicines has been based primarily on improving therapeutic benefit by enhancing safety, with patient survival being equivalent to that resulting from the use of standard treatments .

The book comes in two volumes. They describe the physics and biology of frost occurrence and damage, passive and active protection methods and how to assess the cost-effectiveness of active protection techniques. Nighttime energy balance is used to demonstrate how protection methods are used to reduce the likelihood of frost damage. Simple methods and programs are provided to help predict ...
