TypeScript 2.0. Null- and undefined-aware types. TypeScript has two special types, Null and Undefined, that have the values null and undefined respectively. Previously it was not possible to explicitly name these types, but null and undefined may now be used as type names regardless of type checking mode.. The type checker previously considered null and undefined assignable to anything.

In ECMAScript this is called spread syntax, and has been supported for arrays since ES2015 and objects since ES2018.. Loops and Comprehensions. Most of the loops you'll write in CoffeeScript will be comprehensions over arrays, objects, and ranges. Comprehensions replace (and compile into) for loops, with optional guard clauses and the value of the current array index.
