The Milgram experiment on obedience to authority figures was a series of social psychology experiments conducted by Yale University psychologist Stanley Milgram. They measured the willingness of study participants, men from a diverse range of occupations with varying levels of education, to obey an authority figure who instructed them to perform acts conflicting with their personal conscience.

**Milgram experiment - Wikipedia**

A social experiment is a research project conducted with human subjects in the real world. It typically investigates the effects of a policy intervention by randomly assigning individuals, families, businesses, classrooms, or other units to different treatments or to a controlled condition that represents the status quo. The qualifier "social" distinguishes a policy experiment from a "clinical ...

Bottom Line. The 1940s "Russian Sleep Experiment" is a work of fiction posted on CreepyPasta.com back in 2010. It could have been influenced by historic events such as 1940s medical experiments by Soviet researchers or other questionable studies such as The Stanford Prison Experiment.. Despite being "debunked" for several years, interest in this story has remained consistently high ...
