1. Introduction. The US National Environmental Policy Act (NEPA) not only initiated the development of EIA, but at the same time embedded in the process of EIA the concept of public participation (Petts, 2003). At several international conferences following the introduction of EIA, the importance of public participation for environmental decision-making has been formally recognised.

R<sub>f</sub> values are calculated by looking at the distance each component travels on the chromatography paper compared to the distance traveled by the solvent front. This ratio will be different for each component due to its unique chemical properties. When measuring the distance the component traveled, you should measure from the origin (where the middle of the spot originally was) and then to the ...

In psychology, identity is the qualities, beliefs, personality, looks and/or expressions that make a person (self-identity) or group (particular social category or social group). [citation needed] Categorizing identity can be positive or destructive. A psychological identity relates to self-image (one's mental model of oneself), self-esteem, and individuality.
