1.1 Computing with Language: Texts and Words. We're all very familiar with text, since we read and write it every day. Here we will treat text as raw data for the programs we write, programs that manipulate and analyze it in a variety of interesting ways. But before we can do this, we have to get started with the Python interpreter.

### **1 Language Processing and Python - Natural Language Toolkit**

A demonstrative pronoun points to a particular noun or to the noun it replaces."These pronouns can indicate items in space or time, and they can be either singular or plural," says Ginger Software. When used to represent a thing or things, demonstrative pronouns can be either near or far in distance or time, says the online grammar, punctuation, and spelling checker, offering these examples:
